

BUSINESS INCENTIVES FOR HEATING, VENTILATION AND AIR- CONDITIONING (HVAC), REFRIGERATION AND VARIABLE FREQUENCY DRIVE (VFD) MEASURES

The following information is provided as part of the PowerSavers conservation program to encourage non-residential customers to select and install energy efficient equipment for their facilities. This program is a joint offering from participating utilities of the Minnkota Power Cooperative (MPC) and the Northern Municipal Power Agency (NMPA).

Instructions for Use:

For complete instructions, please refer to the Terms and Conditions on page 9.

Step 1: Determine Eligibility. Equipment must be new and installed in a facility served by one of the participating municipals or cooperatives listed below:

Step 2: Install Equipment. New equipment must be installed and old equipment removed. Product types eligible for incentives are listed on this form. If there is a question regarding eligibility, please consult with your utility. If the potential incentive is greater than \$15,000, contact the utility to get pre-approval.

Step 3: Complete and sign the application. Forms must be received within 60 days of installation. Incomplete applications will cause delays in payment.

Step 4: Attach the following documentation:
Itemized invoices including costs for equipment installed and installation labor.

Step 5: Mail completed paperwork to your utility, listed on page two of this form.

Requirements for all HVAC Measures:

- Must be installed by qualified, insured contractor. New installations only. Must be the primary heating source for the business and be on a list of prequalified units.
- New furnace/indoor unit installations only. Unit must be equipped with an electronically commutated motor (ECM) as original equipment in the furnace, heat pump or indoor blower. Must be the primary heating source for the business.
- Qualifying units are standard split system, furnace integrated for businesses with ductwork. Electricity must be a primary heating source in your new or existing business.
- Unit must be on a list of prequalified units. The furnace and condenser model and serial numbers, evaporator model and serial number, and AHRI reference numbers are required for all installations. All efficiency ratings will be verified using the AHRI database (ahridirectory.org) or manufacturer specifications.
- Geothermal incentives require a heat load calculation to be submitted with the incentive application. Incentive is based off total heating capacity for the business.
- Water-to-water systems need the manufacturer's specifications indicating the equipment meets incentive requirements.
- Indoor units that contain ECM motors which include, fuel-fired furnaces or air handlers with no secondary heating source, also qualify.
- Units must meet or exceed above efficiency levels or carry an ENERGY STAR qualification. Multi-stage units may be qualified based on the following:

$$EER = (\text{highest rated capacity EER} + \text{lowest rated capacity EER}) / 2$$

$$COP = (\text{highest rated capacity COP} + \text{lowest rated capacity COP}) / 2$$
